

HDSICM-1500

HDSICM-2000

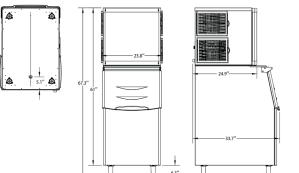

AVAILABLE ICE SIZE:

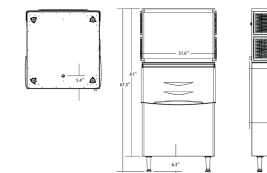

13mm x 22mm x 22mm / 0.5in x 0.9in x 0.9in 22mm x 22mm x 22mm / 0.9in x 0.9in x 0.9in 28mm x 28mm x 22mm / 1.1in x 1.1in x 0.9in 32mm x 32mm x 22mm / 1.3in x 1.3in x 0.9in 38mm x 38mm x 22mm / 1.5in x 1.5in x 0.9in

STANDARD FEATURES

- Intuitive Diagnostics and Controls For ease of maintenance, a built-in diagnostic system will identify problems that your ice machine may be having and will display the issue on the digital controller so it can be repaired accordingly.
- This easy-to-use controller can also be used to monitor the current stage of ice production that your machine is in. It also allows you to adjust the thickness of the ice, so that you can produce ice to your exact requirements, and initiate the cleaning cycle (and displays what stage of the cycle you're in).
- Stainless Steel Construction Constructed of durable type 304 stainless steel with a polyethylene interior, HDS ice machines are built to last in the busiest commercial environments. They are also non-corrosive, making them ideal for settings that are high in moisture and humidity.
- · Included Ice Scoop & Blue LED Lights Included with each unit is an ice scoop and a hook to hang it on, so it is always within convenient reach when you need it. Blue LED Lights illuminate the interior of the ice bin, providing a clear view of the ice. This makes it easier to monitor ice levels and scoop out the ice.
- Adjustable Legs With (4) 6" adjustable legs, you can level your machine on uneven surfaces and have plenty of room to clean
- Side-Breathing with Rear Exhaust The HDS ice machines are designed for side-breathing and rear exhaust, so you can avoid hot air being blown outward into your kitchen or service area.
- Included Single-Stage Water Filter Included with each HDS ice machine is a single-stage water filter that will filter contaminants, and ensure your unit produces high quality ice.
- · Air Cooled. Self-Contained Condensor
- Refrigerant Options All models available in R404A refrigerant setup. Select models available in R290 refrigerant setup.
- Electrical Setup Options All models with ice production capacity equal to or below 500 lbs/24 hrs are available in 110-120/60/1 or 208-240/50 or 60/1. All models above with ice production capacity above 500 lbs/24 hrs are available only in 208-240/50 or 60/1. Three-phase electrical setup may be available upon request.

Designed In USA.

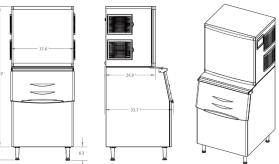

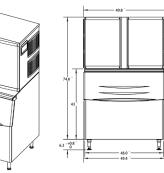

HDSICM-500 / HDSICM-700

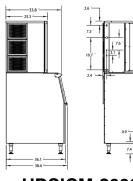

Notice: No more than 7.87inch for the drain
