MR1000INOX

caratteristiche generali • general characteristics

- Bath made in AISI 304
- Compressor GAS R 452A
- Recirculation pump
- Digital thermostat
- Autoclave pump
- Automatic loading
- Overflow drain
- Mounted on wheel (100/200)
- Mounted on feet (300/500/1.000)
- Quick and easy to clean
- Vasca realizzata in AISI 304
- Compressore GAS R 452A
- Pompa di ricicolo
- Termostato digitale
- Pompa autoclave
- Caricamento automatico
- Scarico troppo pieno
- Montato su ruote (100/200)
- Montato su piedini (300/500/1.000)
- Veloce e facile da pulire

The standard equipment includes the electronic regulation of the temperature, the electrical level control with solenoid valve for automatic filling, the water circulation system inside the tank by means of pumps, which serves to accelerate the cooling process, the discharge towards the control unit dosing or directly into the mixer takes place through an electric pump equipped with electronic pressure control, with body completely in brass or stainless steel depending on the size of the machine.

L'equipaggiamento standard comprende la regolazione elettronica della temperatura, il controllo di livello elettrico con elettrovalvola per il riempimento automatico, il sistema di circolazione dell'acqua all'interno della vasca tramite pompe, che serve ad accelerare il raffreddamento, lo scarico verso la centralina di dosaggio o direttamente verso l'impastatrice avviene tramite una elettropompa dotata di controllo di pressione elettronico, con corpo completamente in bronzo o acciaio inox a seconda della grandezza della macchina.

I refrigeratori d'acqua ad accumulo serie MR servono a raffreddare l'acqua destinata alla creazione di impasti per produzioni alimentari come il pane, la pasta, ecc. Sono costruiti in acciaio inox, la vasca e la serpentina evaporatore in AISI 304, e con raccorderie e materiali provenienti solo dal mercato europeo.

GAS di raffreddamento R452S
